Description of Data Collection (Abstract and link to Documentation of Data collection)	The collection “Protests Kazakhstan 2011” contains 317 videos (mp4) on protests in mainly December 2011 (mainly Zhanaozen area) triggered by a worker’s strike at the oilfields. We have downloaded all data in March 2017 and made

Discuss Data – Metadata sheet

	<p>screenshots (pdf) of websites so that the discussion and comments on the single video posts can be followed. All data is processed in an MS Excel database with metadata.</p> <p>We collect all videos that are 1) event related AND show actions of this event, 2) downloadable, 3) we can find with our search words during a particular period. We strictly aim at a systematic and objective selection and organized storage of protest-related videos. Therefore, we have systematically collected videos on protest. We identify particular event-related search words after intense research on the event. According to the snowball principle, we then start the collection of videos with the help of these search words and try to download as much relevant content as possible. However, we cannot guarantee the completeness of protest videos on the particular event. We search the videos and include them into the collection until a particular degree of saturation has been reached. Due to copyright restrictions, we are only allowed to give access to the database of the collected video files including the hyperlinks with its metadata and not to the videos themselves.</p> <p>The videos have been posted mainly by the participants of the events. Therefore, the material is only an extract and biased by the perspective of the single creator.</p> <p>The collection is part of a larger and ongoing collection of videos on protest events in the post-Soviet region.</p>
Keywords / subject (multiple selection possible, e.g. country, subject, discipline)	Zhanaozen, KazMunayGas, protests, Kazakhstan, 2011
Source(s) of the data (e.g. media reporting)	Videos posted mainly by participants of protests on YouTube
Language(s) of Data Collection (e.g. English, Russian)	English, Russian, Kazakh
Methods of data collection (multiple selection possible, e.g. document collection, focus group, interview, survey, text mining, etc.)	Collection of video posts by snowball principle combined with a keyword search on the video platform YouTube. A systemic search has been done in the Russian and English language only.
